PROFESSIONAL SUMMARY

- Full-stack Software Engineer with 2 years building production APIs, full-stack systems and AI-powered workflows in early-stage startups. Experienced working closely with product teams and real users to translate operational needs into scalable technical solutions and automated processes that improve efficiency.
- Strong interest in product management, system design, and user-centered problem solving. Known for shipping fast, writing clear API architecture, and improving workflows through practical engineering decisions and automation.

TECHNICAL SKILLS

- Backend: Node.js, Express, Java (Spring Boot), Python (Django), PostgreSQL
- Frontend: React, TypeScript, Tailwind CSS
- Product & Collaboration: API design, requirements clarification, cross-team collaboration, documentation
- Tools: Docker, Git, GitHub Actions, CI/CD, REST APIs, Postman

PROFESSIONAL EXPERIENCE

Backend Software Engineer 2025 - present
MaterialsPro(Construction Technology Startup) -Remote

- Designed and maintained secure REST APIs supporting homeowners and contractors
- Collaborated directly with product stakeholders to translate real user needs into backend features
- Implemented role-based access systems and scalable relational data models (PostgreSQL)
- Shipped containerized services using Docker and AWS environments
- Helped validate features quickly with early adopters to improve product decisions

Software Engineering Trainee 2024 - 2025
Semicolon Africa

- Built production-ready APIs using Java Spring Boot and React frontends
- Developed database-backed applications using MySQL, PostgreSQL, and MongoDB
- Practiced TDD with JUnit and implemented CI/CD pipelines with GitHub Actions
- Documented APIs and improved team development workflows

Customer Service Support 2023 - 2024
Reliance Health

- Worked cross-functionally with operations teams to improve customer workflows
- Reduced complaints by 30% through proactive issue resolution
- Trained new staff and improved CRM processes

EDUCATION

• EvolveHQ <i>Prompt Engineering and AI Automation</i>	2026
• Semicolon Africa <i>Software Engineering</i>	2024 - 2025
• Henley Business School, UK <i>Diploma in Business Education</i>	2025
• Digital Marketing Skill Institute <i>Diploma in Digital Marketing</i>	2023 - 2024
• University of Benin, Benin city <i>Bsc. Banking and Finance</i>	2015- 2018

PROJECTS

EaziPurse - Digital Wallet Application | Python (Django), PostgreSQL, ReactJs, RTKQuery | [Live Dashboard](#)

- Built a full-stack wallet system with secure JWT authentication
- Implemented role-based access and real-time transaction workflows
- Containerized deployment with Docker

Christian Professionals Network (CPN) | Node.js/Express.js, PostgreSQL, ReactJs, RTKQuery | [Live Dashboard](#)

- Designed scalable backend architecture with admin dashboard
- Implemented authentication, wallet tracking, and reporting systems
- Built analytics features supporting operational decisions

SafeGad (Anti-theft Tracker App -Android) | Java(Springboot), Flutter, Kotlin, ReactJs, Postgresql
[Java on Github](#) [Flutter and Kotlin on Github](#) [ReactJs on Github](#)

- Contributed to Android tracking system with remote device commands
- Integrated Spring Security and Firebase notifications
- Collaborated across web + mobile teams

AI Voice Receptionist for Tasty's Restaurant| n8n, ElevenLabs, AI Agents, Google Workspace
[Demo](#)

- Built a sophisticated n8n workflow integrating ElevenLabs, AI Agents, and Google Workspace for automated customer communication, content generation, operational reporting and Lead generation.

AI Telegram Chatbot For a Real Estate Firm| n8n, Supabase, Embeddings cohere, ...
[Demo](#)

- Built a sophisticated n8n workflow integrating Supabase, vector database, LangChain, AI agents, Google Workspace, RAG, Telegram API and HTTP API integration for automated lead generation, customer communication, content generation, and operational reporting.
